

RUMEN COMPLETE®

Natural Probiotic Support for Healthier, More Productive Livestock

OVERVIEW

Rumen Complete® is a premium natural probiotic formulated to support rumen function, digestive health, and overall livestock performance. By promoting a balanced microbial environment within the rumen, it helps animals utilise feed more efficiently while supporting their natural immune system and overall wellbeing.

Developed with beneficial bacteria and biological technology, Rumen Complete® forms part of Landbou365's commitment to sustainable animal health solutions that work in harmony with nature.

HOW IT WORKS

The rumen is home to billions of beneficial microorganisms responsible for breaking down feed and converting it into nutrients that animals can absorb. Stress, dietary changes, illness, or environmental factors can disrupt this delicate balance.

Rumen Complete® replenishes beneficial bacteria within the digestive system, supporting healthy microbial activity, improved digestion, and more efficient nutrient utilisation. A healthy rumen contributes to stronger animals, better feed conversion, and improved overall performance.

PRODUCT FEATURES

- ✓ Natural Probiotic Formula
- ✓ Supports Healthy Digestion
- ✓ Promotes Efficient Feed Utilisation
- ✓ Suitable for Multiple Livestock Species
- ✓ Environmentally Responsible Solution

WHY CHOOSE RUMEN COMPLETE®?

Natural Biological Technology

Works with the animal's natural digestive processes rather than relying on harsh chemical interventions.

Supports Animal Performance

Healthy digestion is the foundation of efficient feed utilisation, growth, and productivity.

Sustainable Farming

Promotes healthier livestock through environmentally responsible biological solutions.

Trusted Quality

Part of the Landbou365 range of science-based products developed to support sustainable agriculture.

KEY BENEFITS

- Supports healthy rumen function
- Promotes a balanced digestive system
- Encourages efficient feed utilisation
- Helps maintain healthy gut microflora
- Supports natural immune function
- Contributes to improved animal health and productivity
- Easy to incorporate into existing livestock management programmes

SUITABLE FOR

Rumen Complete® is suitable for a variety of livestock operations, including:

- Beef Cattle
- Dairy Cattle
- Sheep
- Goats
- Birds
- Poultry
- Feedlots
- Mixed Livestock Enterprises

RECOMMENDED APPLICATIONS

Rumen Complete® can be incorporated into livestock management programmes to support:

- Daily digestive health
- Periods of nutritional or environmental stress
- Healthy rumen microbial balance
- Feed efficiency programmes
- General herd health management

Always follow the recommended dosing instructions supplied with the product or consult your Landbou365 representative for guidance.

APPLICATION

- Mix 200g/ 155ml of Rumen Complete with 1 Litre of water
- Let stand mixture for 15 min before use

DOSE FOR INTERNAL ILLNESSES

- Cattle: 200-250ml of mixed product
- Calves: 60-100ml of mixed product
- Sheep: 40-60ml of mixed product
- Lamb: 15-25ml of mixed product
- In cases of ill animals repeat every 7 days for at least 3 times
- In SEVERE cases where the animals are too ill to get up administrate with 2-3 litres of clean water after dosage
- For preventative you can give it 1-2 a month.

EXTERNAL USE

- Use the mixed product and spray it on areas on the skin or eyes of the animal.
- Repeat every 7 days

TROUGHS

- Mix 1.3kg/1litre of Rumen Complete with 1000 litres of water

Component	%
Organic Carbons Blend	40
Organic Nitrogen (N)	3
Potassium (K2O)	4
Organic Carbon (C)	10
Organic Matter	31
Water	12

STANDARDS FOR STORAGE

- Sheltered, dry storage at a temperature of 5°C and 45°C without major daily fluctuations.
- Should there be a swelling of the container, loosen the lid to allow the gas to escape.
- Product is not flammable.

CAUTION

- Shake before use. In the event of accidental discharge of the product, absorb with inert materials and deal with according to the local regulations.
